

>>> PRESIDENTIAL PRODUCT ROADMAP

Build Proof, Not Just Interest.

Every member leaves AnderTech with a portfolio, a skill, and a community that helped them get there.

THE NORTH STAR

AnderTech is a tech skills + experimentation lab — not a single career funnel.

We actively de-center the idea that recruiting for tech = PM pipeline only. We support builders across all paths:

- Product Management
- Product Marketing
- Strategy
- Operations
- Program Mgmt
- Tech Consulting
- Project Mgmt

NEW FEATURES

>> FLAGSHIP INITIATIVE

2Y Internship Showcase & Networking Night

Second years present their internships to first years: company, role, recruiting strategy, interview tips, and what they'd do differently.

Format: Lightning talks + poster stations organized by company/function, followed by open networking with warm intros built in.

Real intel, not polished panels. Warmer follow-ups. Transparency as a norm.

>> CORE PROGRAMS

Portfolio-First Mindset

Every member builds tangible proof of skills: projects, demos, GitHub repos, live apps. Portfolios become the common denominator across all roles.

- Elite Technical Support:
- + Vibe coding guidance & workshops
 - + SQL trainings for all levels
 - + Continue to expand certification opportunities (Lean Six Sigma, Scrum)
 - + "How to actually build this" sessions
 - + UX Design Thinking workshop sessions

COMMUNITY

BUG FIXES // OPERATIONS

Failure Isn't a Bug, It's a Feature

Recruiting is brutal. But it doesn't have to be isolating.

The biggest thing we can fix isn't logistics --

it's making sure no one goes through setbacks alone. We turn failure into fuel.

>> SHARED SUCCESS

Shared Success Over Competition

Continue to promote peer-to-peer support as the norm – building on the strong foundation this year's leadership has set. Keep 'we help each other win' as a visible cultural value across recruiting, projects, and day-to-day club life.

>> FAILURE = FEATURE

Failure as a Feature

Build on the "Shared Failure" group chat to create explicit space for sharing rejections, misses, and hard lessons. Normalize how brutal recruiting can be. Treat failure as collective learning, not private shame.

>> SUPPORT

Support Through Recruiting Lows

Acknowledge rejection as part of the process. Encourage members to talk openly, share learnings quickly, and celebrate effort – not just outcomes.

USER EXPERIENCE // COMMUNITY & CULTURE

Tech for Everyone. Empower the Pivot.

AnderTech is a space where curiosity is rewarded and asking for help is normal -- let's build on that.

>> INCLUSIVE BY DESIGN

For career pivoters, the learning curve isn't just steep -- it can feel isolating. By leaning into tactical tech support (vibe coding, SQL, certifications, UX workshops), we meet every member where they are -- from first-time builders to experienced operators leveling up.

>> COMMUNITY RITUALS

2Y Internship Showcase brings transparency and generosity into the recruiting process. Failure-sharing sessions make setbacks a collective learning experience, not isolation. Vibe coding training sessions will ensure that everyone who wants a portfolio will have one, and everyone who wants to build is empowered to do so.

AnderTech isn't just a club. It's a launchpad.

>>> Let's build proof -- together. <<<
