Platform Summary

While AnderTech already offers valuable programming and support, much of the recruiting journey still depends on individual initiative, background, and luck. As hiring expectations rise and recruiting cycles become more unpredictable, it's necessary to complement what already works with more structured systems, clearer networking pathways, and shared accountability so that outcomes are less dependent on who happens to self-direct early.

In short, AnderTech should double down on its role as a professional club and focus on what most directly drives career outcomes.

Our Mission

AnderTech exists to help every member land in a role they are genuinely excited about, not by chance, but through preparation, persistence, and community.

Our Vision

We believe Anderson students bring empathy, thoughtfulness, and integrity to the tech industry, qualities that are increasingly essential in shaping responsible and human-centered technology. Our long-term goal is to intentionally grow an enduring Anderson presence in tech, where each graduating class strengthens a network of mentors, hiring managers, and advocates who open doors for those who follow.

Our Strategic Pillars

1. Leading Over Lagging Indicators: Job offers are lagging indicators. By the time we measure them, the opportunity to meaningfully influence outcomes has largely passed. Instead, AnderTech will focus on leading indicators, the habits and behaviors that consistently drive strong recruiting results, such as skill development, networking, and structured preparation. By encouraging and tracking these inputs early and often, we give members more control over their trajectory and reduce reliance on timing or luck.

2. Leaving Nothing to Chance: Recruiting will always involve uncertainty, but preparation should not. Members should approach opportunities with a clear understanding of their strengths, a defined set of target roles and companies, and a thoughtful plan for how they will prepare and position themselves. AnderTech will foster a culture of shared accountability, where preparation is visible, consistent, and supported by peers. By making progress a collective effort rather than a solitary one, we help members stay on track and follow through their plans.

3. Fully Formed Adults: High-performance organizations hire people who can contribute immediately, not those who are still in training. AnderTech will help members build the skills and industry acumen needed to add value from day one by emphasizing tangible proof of ability, real-world connections, and ownership of meaningful work.

Our Roadmap

	Build Value	Show Value	Activate Value
Headline	Members develop real, job-ready capability through structured practice and proof of work.	Members learn to communicate their value and operate like peers in hiring processes.	Members activate preparation through real access, relationships, and opportunity pathways.
Pain Point(s)	Members want to build portfolios and skills but lack a step-by-step game plan for how to execute	Members know prep matters but will delay when structure, accountability, and urgency are absent	Members lack frequent and open access to alumni, companies, and campus networks.
Action 1	Portfolio & Prototype Sprints	Streamlined Application Materials	Formalized Alumni Engagement Model
Action 2	Guided Skills Track (learning series designed for specific functions)	Recurring Mock Interview Cycles (ACT, IPT, and peer partner sessions)	Stronger Integration with Easton, Faculty and Professional Clubs
Action 3	Case Competition Participation Engine	Networking & Coffee Chat Simulation Labs	Targeted LA Tech and Startup Engagement
New Initiative	Builders Conference Series (sessions that enable members to navigate design sprints, app-builds, and portfolio websites)	Hit Your 40 Hours of Prep (preparation across self-study, ACT, IPT, and partner case practice with pre and post-program evaluation)	Academic Internship “Career Nights” (connecting members with local startups to develop real-world experience through the year)
Leading Metric(s)	% of members with at least one portfolio artifact # of case and skill sessions attended per member	# of mock interviews completed % members completing 40 hours of interview prep before recruiting deadlines	# of members attending Easton and partner touchpoints # of coffee chats per member
Community Principle	Shared Learning Learning becomes a social endeavor where trial and error become communal bonds rather than personal failures	Shared Excellence We set the bar high and hold ourselves accountable, doing everything we can to ensure every member rises to meet it.	Shared Success Today’s success becomes tomorrow’s opportunity, as members build a network that continues to create pathways for future generations of AnderTech
