

The North Star (Vision) : *Show, Don't Tell*

My goal is for every AnderTech member to gain hands-on experience with technology and leave with something tangible to show for it. Because we all come to the MBA at different levels of technical fluency, success looks different for each member. As president, my aim is to ensure that everyone engages at least one level deeper than where they began.

Defining our users (AnderTech Members)

	New to tech	Semi-technical	Highly technical
Description	Pivoting into tech from another industry	Have some experience working in tech, but might be trying to pivot functions	Come from the tech industry, may have a technical background, looking for career growth/functional pivot
Painpoints	Put off/Intimidated by jargon	Not enough time to tailor resume to pivot	Limited opportunities to connect with like-minded tech enthusiasts
	Not enough time to catch up before recruiting starts	Limited opportunities to practice tech skills	Very limited focus on TPM preparation during ACT/IPT
	Limited opportunity to interact with fellow AnderTech members		
	Anxiety around when applications will open and close, whether invites and offers are still rolling		

New Features (Innovation) and User Experience (Community)

Quarter	Vertical	Proposed Initiative	User Experience
Pre-MBA	L&D	Tech Playlist/Reading List: Share a list of YouTube/book/podcasts recommendations with incoming students interested in tech so they are familiar with roles, terminology and jargon	Reduce some of the intimidation felt during the tech immersion
Summer/ Fall	Recruiting	Resume Auditor Bot: Offer access to a resume auditor bot so first years can start refining their experiences as soon as possible	Give first years a head start before second years come in
Fall	Easton Center Relations	Product Speaker Sessions: Taking inspiration from VGBA's "Gaming 101", we'll host short sessions where speakers breakdown product concepts like acquisition, retention, stickiness, monetization	Continue member education after tech immersion ends
Fall	Community	Member Directory: Book of all members (their backgrounds and interests) that can be used to find teammates for case comps, capstones, beyond mba etc	Facilitate Member-to-Member connection and socializing, Create potential alumni resource for later

Fall	Community /L&D	Vibe Coding Contest - E.g.: <i>Build a working product that you think would've improved your experience as an incoming MBA candidate</i>	Give members their first taste of building something , facilitate Member-to-Member connection
Fall	Recruiting	Live Recruiting Dashboard - A live tracker of the number of invites and offers from tech companies (receiving member's names will remain hidden)	Create transparency and curb the anxiety around recruiting
Fall	Recruiting	Job Boards: Share a list of job boards (internlist, jobright, ziprecruiter) that cover non MBA tech roles	Surface more tech opportunities than seen on MyCareer
Fall	Community	Christmas Card-o-Late Drive: Members can write end of year appreciation notes to each other, AnderTech will collect and deliver a bag of notes + candy to each member	Foster connection and help people feel good at the end of a rough quarter
Winter + Spring	L&D	Monthly Product Teardowns: Every month AnderTech will reveal a theme (E.g.: Stickiness) and members can team up to analyze a product for levers. The best submissions (Easton can help identify) will present their decks to the rest of the club.	Encourage engagement with concepts in tech. Create portfolio material for members
Winter + Spring	Community	Tech Trivia Night (Team-based activity): <i>"Before becoming the world's largest search engine, this company was originally called "BackRub" because it analyzed backlinks. Can you name the company?"</i>	Expand general knowledge and collect interesting tidbits to drop at your next job interview
Winter + Spring	Recruiting	Just-in-Time Job Scraper: Run a biweekly scraper to find new full-time openings and post them on a Slack channel	Assist Second Years with just-in-time recruiting

Bug Fixes (Operations)

- (1) **Professionalism guidelines:** Set and enforce clear professionalism norms from Day 1 - no laptops or phones at events, name tags required, and inclusive networking behavior (making space, limiting questions)
- (2) **Recruiting timelines:** Recruiting timelines are increasingly unpredictable, with roles closing earlier than expected. To reduce risk, we should aim to have members resume-ready by Week 3 of September, rather than Week 1 of October
- (3) **DoJs:** DoJs create anxiety and frustration due to limited company choice, high costs, and last-minute travel. Introducing a few virtual DoJs with company-specific alumni panels (e.g., Adobe, Google, Amazon) would improve accessibility and equity
- (4) **Slack Hygiene:** Our Slack communication is high-volume and text-heavy. Pair announcements with simple visuals or posters that communicate the core idea of each event and reduce cognitive load. Use a standardized template supported by a Google Sheet + Canva (or Canva + GPT) workflow
