

AnderTech 2026-27 Product Roadmap

Hi! I am Ateken – I am excited to share my vision for AnderTech President.

MY NORTH STAR:

AnderTech is a community driven by a passion for innovation; we help each other navigate a constantly evolving technology landscape while cultivating belonging through purposeful and fun experiences!

INNOVATION: UCLA ANDERSON BUILD COMPETITION

I am excited to propose the **UCLA Anderson Build Competition**, a two-week innovation sprint that reflects the unique mix of technology, entertainment, and creativity that defines Los Angeles. In partnership with leading companies across tech, media, AI, and emerging industries, students will tackle real strategic challenges shaping the future of innovation. Teams will be encouraged to build diverse teams, reflecting how modern tech organizations actually operate across product, strategy, operations, design, and AI. Finalists from MBA programs across the country will compete in person at UCLA Anderson, presenting to a judging panel of company leaders and faculty.

This adds value to AnderTech members by:

- Delivering real-world innovation experience beyond traditional recruiting prep
- Creating a differentiated, resume-ready project with direct company exposure
- Establishing AnderTech as a premier, outward-facing innovation center that elevates Anderson's presence in the tech ecosystem

OPERATIONS: ANDERTECH RECRUITING DASHBOARD

AnderTech is the largest tech-focused community at Anderson, with hundreds of members recruiting simultaneously. That scale creates a powerful opportunity for real-time recruiting intelligence. Visibility into timelines, interview momentum, and offer flow can feel fragmented, and in a high-pressure environment, information should not depend on who you know. An AnderTech Recruiting Dashboard could be a centralized, continuously updated hub for tech recruiting. Members will be able to see visual insights into interview stages and take action on active job postings.

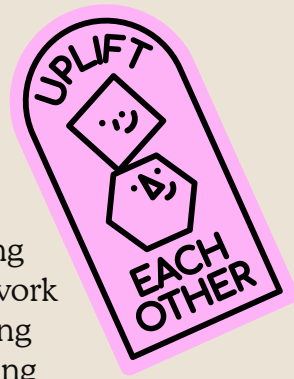

This adds value to AnderTech members by:

- Helping them understand recruiting momentum in real time
- Making outreach and decision-making more strategic
- Reducing anxiety by increasing visibility

COMMUNITY: ANDERTECH PASSPORT

Engagement in student clubs often becomes episodic. First-years can feel overwhelmed, second-years can feel removed, and participation beyond recruiting can drop off. The AnderTech Passport will create a year-long engagement framework that encourages connection and contribution. Members earn “stamps” by attending role-expansion sessions, participating in DOJs, completing coffee chats, contributing recruiting insights, or joining monthly tech socials. Progress is visible and recognized quarterly through prizes and perks to reinforce participation.

This adds value to members by:

- Encouraging intentional cross-cohort connection
- Making contribution visible and rewarding
- Strengthening community beyond recruiting season

Thank you for your time and consideration! - Ateken
